

Jude Christian Agagad

Full Stack Developer

Professional Summary

Accomplished Full Stack Developer with a strong record of optimizing critical applications for reliability and performance. Expertise in scalable database design, efficient backend development, and seamless integration of machine learning for accurate results. Skilled in cross-functional collaboration to align strategies with client requirements, enhancing project outcomes. Proficient in crafting AI features for improved user experiences.

Work Experience

Software Engineer | Jul 2022 – Present

Teleserve Asia, Legazpi City

- Built and deployed Robotic Process Automation (RPA) solutions with Python to automate client based requirements and operational workflows.
- Architected and implemented end-to-end full-stack solutions using Django, PostgreSQL, and React for AI-powered call center platforms serving internal and external stakeholders.
- Built real-time transcription and agent-assist systems integrating AI speech-to-text and language models, improving agent response efficiency and workflow automation.
- Designed relational database schemas and optimized complex PostgreSQL queries to handle high-volume call records and analytics.
- Led feature development from requirement analysis to deployment, ensuring production stability, scalability, and maintainability.
- Developed real-time data pipelines using WebSockets to stream transcription results and AI-generated suggestions to the frontend.
- Designed and implemented interactive dashboards for live call monitoring, reporting, and performance tracking.

Vulnerability Assessment and Penetration Testing | Dec 2021 – Apr 2022

TMJP BPO Services Inc., Taguig City

- Provide recommendations, solutions for vulnerabilities and exploits discovered during testing as a report
- Create and perform test scenarios for pentesting infrastructure and applications
- Making well documented reports for identified and assessed vulnerabilities and exploits in web applications during penetration testing assignments.

Full Stack Developer | Aug 2020 – Jan 2021

TMJP BPO Services Inc., Taguig City

- Applied automated tests, speeding up testing and making the software more reliable.
- Created and maintained custom software solutions as per client needs
- Improved code quality and team performance through thorough code reviews for project commits.
- Collaborated closely with cross-functional teams to ensure the seamless deployment of software, fostering a collaborative environment and expediting project timelines.
- Integrated AWS services into projects, amplifying operational efficiency, scalability, and overall performance.

Front end Developer | May 2019 – Mar 2020

Boomsourcing, Legazpi City

- Created and maintained a design system for consistent UI/UX across multiple projects, resulting in a more streamlined development process and higher user satisfaction.
- Contributed to client-side development including server-side scripting.
- Used various design tools to create user-friendly web designs.
- Developed multiple front-end projects using different development frameworks.
- Participated in sprint planning and code reviews, fostering a collaborative and efficient agile environment

Academic History

Boom.Camp, Legazpi City | May 2019 – Sep 2019

Full-stack Web Development Program

Forbes College, Legazpi City | Jun 2015 – Apr 2019

Bachelor of Science in Information Technology

Awards and Certification

Certificate of Completion (2019)

Successful completion of Boom.camp from May 15 to September 6 2019 and now a certified Jr. Front End Developer at Boomsourcing, LLC

Certificate of Participation (2017)

Awarded for actively participating the workshop entitled "Game Development: First Hand Experience for New Trend in I.T. Industry"

Certificate of Achievement (2017)

Awarded champion of Senior Programming Competition Dated March 1, 2017 at Aquende 3 Bldg., Forbes College, Legazpi City

Skills

Frontend: React, Redux, JavaScript (ES6+), HTML5 & CSS3, Responsive UI Development

Backend: Python, Django, Django REST Framework, PHP, Node.js, REST API Development

Database: PostgreSQL, MongoDB, MySQL

Tools & Environment: Git, Linux / WSL, Postman, AWS Technologies, CI/CD
